Summit Strategies Group Participates in 4th Annual Service Day

St. Louis, Missouri—Summit Strategies Group joined forces with Habitat for Humanity once again for its annual service day. Our associates donated their time as Builder’s Club Team volunteers to help in the construction of a local home. They spent the day building up the lower foundation walls with hollow Styrofoam blocks, which would later be pumped full of concrete, and installing steel rebar at each level to provide additional support. The team was fortunate to meet the homebuyer, who was also on site assisting in the efforts and excited about the prospects of the new home he will share with his two-year old son.

We are proud of our associates generously giving of their time and talents for another year with a great organization like Habitat for Humanity.

About Summit Strategies Group

Summit Strategies Group is one of the industry’s leading investment consultants focused on developing long-term partnerships with institutional investors. Founded in 1995, we have been serving our clients, including endowments and foundations, hospitals and health care systems, public funds and corporations (defined benefit and defined contribution plans), for more than 20 years.

We provide traditional full-service consulting, defined contribution and outsourced CIO services. Our extensive in-house resources and research capabilities enable us to help clients meet their investment objectives. We have highly experienced professionals in the areas of consulting, capital markets and risk management, manager research, operational due diligence, and performance measurement and analytics.
